

WEB FRAMEWORKS 2021/2022

Tabs

Add a new subpage accessible from the main menu, e.g:

```
<ul class="dropdown-menu">
  ...
  <li><a class="dropdown-item" href="wersal.html">Wersal Guide</a></li>
</ul>
```

Prepare a container for information. Also, copy menu from the indx.html page. All information about Wersal will be displayed using Tab component.

Prepare a scheme of tab navigation (inside `<div class="container">`) :

```
<div class="row">
  <div class="col-sm-8"> # we add sth of the right side of page later
    <ul class="nav nav-tabs">
      <li class="nav-item">
        <a class="nav-link active" href="#" data-bs-toggle="tab">
History</a>
      </li>
      <li class="nav-item">
        <a class="nav-link" href="#" data-bs-toggle="tab">
Gallery</a>
      </li>
      <li class="nav-item">
        <a class="nav-link" href="#" data-bs-toggle="tab">
Events</a>
      </li>
      <li class="nav-item">
        <a class="nav-link" href="#" data-bs-toggle="tab">
Prices</a>
      </li>
      <li class="nav-item">
        <a class="nav-link" href="#" data-bs-toggle="tab">Map</a>
      </li>
    </ul>
  </div>
```

Now let's add a content to be displayed after someone selects a tab. Every element should have href attribute to allow navigation. Additionally, we can add an id to style an element:

```
<div class="col-sm-8">
  <ul class="nav nav-tabs" id="wersalTabs">
    <li class="nav-item">
      <a class="nav-link active" href="#history" data-bs-
toggle="tab" id="historyTab">History</a>
    </li>
    <li class="nav-item">
      <a class="nav-link" href="#gallery" data-bs-toggle="tab"
id="galleryTab">Gallery</a>
    </li>
```

```

        <li class="nav-item">
            <a class="nav-link" href="#events" data-bs-toggle="tab"
id="eventsTab">Events</a>
        </li>
        <li class="nav-item">
            <a class="nav-link" href="#prices" data-bs-toggle="tab"
id="pricesTab">Prices</a>
        </li>
        <li class="nav-item">
            <a class="nav-link" href="#map" data-bs-toggle="tab"
id="mapTab">Map</a>
        </li>
    </ul>
    <div class="tab-content" id="wersalContent">
        <div class="tab-pane fade show active" id="history"></div>
        <div class="tab-pane fade" id="gallery"></div>
        <div class="tab-pane fade" id="events"></div>
        <div class="tab-pane fade" id="prices"></div>
        <div class="tab-pane fade" id="map"></div>
    </div>
</div>

```

Now let's add the content of every single tab:

➔ History tab - we can fill it using lorem ipsum:

```

<div class="tab-pane fade show active" id="history">
    <h2>Lorem ipsum</h2>
    <p>Lorem ipsum dolor sit amet, consectetur adipiscing
elit. Sed vitae erat odio. Donec et imperdiet massa. Quisque ornare
molestie egestas. ....</p>
    <h2>Lorem ipsum</h2>
    <p>Ut .... tumst.</p>
</div>

```

➔ Gallery tab - we can fill it by adding a few images of Wersal, e.g.:

```

<div class="tab-pane fade" id="gallery">
    <div class="row mt-3">
        <figure>
            
            <figcaption>The Palace</figcaption>
        </figure>
    </div>
    <div class="row">
        <figure>
            
            <figcaption>The Gardens</figcaption>
        </figure>
    </div>
    <div class="row">
        <figure>
            
            <figcaption>The Fountains</figcaption>
        </figure>
    </div>
    <div class="row">
        <figure>

```

```

        
        <figcaption>The Pond</figcaption>
    </figure>
</div>
<div class="row">
    <figure>
        
        <figcaption>The Great Hall</figcaption>
    </figure>
</div>
</div>

```

➔ Events tab – we can fill it with table of events:

```

<div class="tab-pane fade" id="events">
    <table class="table table-hover mt-3">
        <thead>
            <tr>
                <th scope="col">Date</th>
                <th scope="col">Description</th>
                <th scope="col">Price per person</th>
            </tr>
        </thead>
        <tbody>
            <tr>
                <th scope="row">on Sundays</th>
                <td>Lorem ipsum</td>
                <td>50 EUR</td>
            </tr>
            <tr>
                <th scope="row">12.12.2020</th>
                <td>Lorem ipsum</td>
                <td>25 EUR</td>
            </tr>
            <tr>
                <th scope="row">13.12.2020</th>
                <td>Lorem ipsum</td>
                <td>40 EUR</td>
            </tr>
        </tbody>
    </table>
</div>

```

➔ Price tab – we can fill it with table of ticket prices:

```

<div class="tab-pane fade" id="prices">
    <table class="table table-dark table-bordered mt-3">
        <thead>
            <tr>
                <th scope="col">#</th>
                <th scope="col">Standard</th>
                <th scope="col">Student</th>
            </tr>
        </thead>
        <tbody>
            <tr>
                <th scope="row">1 hour</th>
                <td>15 EUR</td>
            </tr>
        </tbody>
    </table>
</div>

```

```

        <td>10 EUR</td>
    </tr>
    <tr>
        <th scope="row">17:00-21:00</th>
        <td>30 EURO</td>
        <td>25 EUR</td>
    </tr>
    <tr>
        <th scope="row">Whole day</th>
        <td>50 EURO</td>
        <td>40 EUR</td>
    </tr>
    <tr>
        <th scope="row">Weekend</th>
        <td colspan="2">50 EURO</td>
    </tr>
</tbody>
</table>
</div>

```

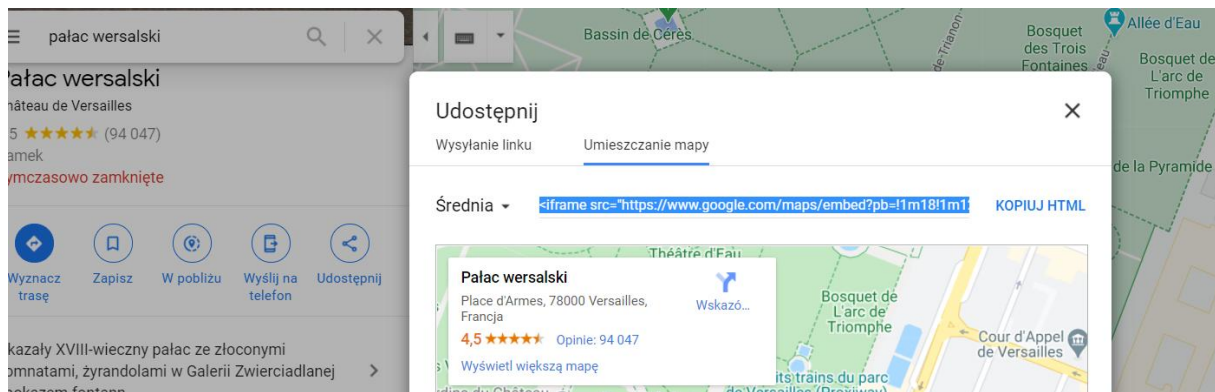

➔ Map tab – let’s add Google Map showing Wersal location:

```

<div class="tab-pane fade" id="map">
    <!--Google map-->
    <div id="google-map" class="embed-responsive embed-responsive-1by1">
        // here is the link to google maps
    </div>
</div>

```

Link to be copied:

Now let’s prepare the right side of the page and add „Opening hours” and „Contact” tabs version:

```

<div class="col-sm-4">
    <ul class="nav nav-tabs" id="wersalTabsRight">
        <li class="nav-item">
            <a class="nav-link active" href="#openingHours" data-bs-
toggle="tab">
Opening Hours</a>
        </li>
        <li class="nav-item">
            <a class="nav-link" href="#contact" data-bs-toggl
e="tab">

```

```
Contact</a>
  </li>
</ul>
<div class="tab-content" id="wersalTabsRightContent">
  <div class="tab-pane fade show active" id=" openingHours ">
    <p>Mon - Fri: 7:00 - 22:00</p>
    <p>Sat - Sun: 8:00 - 24:00</p>
  </div>
  <div class="tab-pane fade" id=" contact ">Lorem ipsum</div>
</div>
</div>
```
